

TD Centre achieves BOMA BEST Level 3 Certification

February 22, 2011 (Toronto, ON) - Cadillac Fairview and the Toronto-Dominion Centre are proud to announce that we have achieved BOMA BEST (Building and Owners Managers Association of Canada Building Environmental Standards) Level 3 Certification at five of our towers: TD Bank Tower, 77 King, 100 Wellington, TD Waterhouse Tower and Ernst & Young Tower. Our BOMA BEST certification application for 95 Wellington will occur later this year, with promising results.

BOMA has specifically developed this unique national certification program for existing commercial buildings in order to recognize and reward environmental leadership within the commercial real estate industry, awarding TD Centre the BOMA BEST Level 2 Certification in 2007.

This prestigious certification builds upon a long history of enhancements to the property with operating efficiency in mind, including the successful implementation of LEED and Cadillac Fairview's national GREEN AT WORK™ program. We achieved BOMA BEST Level 3 by meeting all of the program's best practices in environmental management, which include reducing energy consumption and waste, improving environmental protection, encouraging sustainable procurement and building tenant awareness.

We recognize that this achievement could not have been accomplished without significant tenant involvement, so we share this great honour with you and thank you for your ongoing support.
